

MEDIA RELEASE

QRSciences Security Pty Ltd announces new Detection Products Division!

Tuesday, 25 March 2008

QRSciences Security Pty Ltd is following the tremendous success of its video products distribution business, Q Video Systems, with the launch of a new security screening products division, Q Detection Systems.

Q Detection Systems combines a range of industry leading detection products from parent company QRSciences and sister company Spectrum San Diego, with products from some of the world's leading screening product manufacturers including Astrophysics Inc – US based developer and manufacturer of x-ray inspection equipment for baggage screening in security applications.

An industry leader in the research, development, and manufacture of x-ray scanning systems used for security and NDT; Astrophysics manufacture standard, automated, and cargo x-ray systems offering a range of models that suit the purposes of a host of applications. The performance of Astrophysics systems exceeds all standard x-ray systems in spatial resolution, wire detection, and non-distorted zoom. Astrophysics delivers turnkey x-ray inspection systems to customers worldwide for use at airports, government buildings, Customs, banks, courthouses, hospitals, prisons and many other locations.

QRSciences Security's Sales and Marketing Director Paul Thompson says: "This is a natural progression for us – when QRSciences acquired the CCTV distribution business in 2006 it was always the intention to use that expertise to bring a new, exciting look to the distribution of security screening products in Australia. Our appointment as distributor of Astrophysics x-ray systems is just the first of several major announcements for Q Detection Systems in the coming months".

QRSciences Security Pty Ltd is a wholly owned subsidiary of QRSciences Holdings. QRSciences Security's distribution businesses 'Q Detections Systems' and 'Q Video Systems' combine to give the company an unprecedented range of security solutions ranging from CCTV Cameras to Explosives Screening Solutions.

About QRSciences

QRSciences Holdings Limited is based in Melbourne, Victoria with offices in Perth, Western Australia and San Diego, California. Its wholly owned CCTV distribution business Q Video Systems is based in Port Melbourne, Australia. The primary commercial focus of QRSciences is the design, development and sale

of advanced technology systems, sub-systems, components and software for security related applications. Applications for its technologies and products include the detection of explosives and narcotics, metal detection and imaging, surveillance and monitoring.
